

Elchin Aliyev

FullStack/Python Web developer

Full Stack Web Developer with over three years of experience crafting high-performance and scalable web applications. Starting as a self-motivated learner in 2021, I have grown into a professional developer delivering real-world solutions since 2023.

I specialize in building intuitive, efficient, and user-focused digital products. Passionate about clean architecture and continuous improvement, I aim to create impactful solutions that drive both user satisfaction and business success.

Work Experience

Bamper.az – Backend Web Developer

March 2023 – July 2024

- Contributed to the development of a scalable car parts e-commerce platform
- Focusing on backend architecture
- API development
- System optimization.

Div Academy Kids – Full stack mentor

October 2024 – October 2025

- Applying an individualized approach by providing explanations tailored to each student's level
- Using interactive teaching methods
- Strengthening knowledge through practical tasks and project-based learning

Div Academy Kids – Full stack instructor

October 2026 – July 2026

- Preparation of lesson materials, application of interactive teaching methods, and development of students' programming logic through practical exercises
- Monitoring students' individual progress and supporting them in working on real-world projects.

Projects

Tedspace.io

Improvement of existing projects, implementation of new features, and optimization of code structure. Ensuring proper integration of data flow between frontend and backend.

Skills Gained:

HTML 5, CSS 3, Django Framework, FastApi

<https://ispace.onrender.com>

The design of the web application, development of backend APIs, and deployment to production on the Render cloud platform were carried out.

Skills Gained:

HTML 5, CSS 3, Java Script, Django Framework, FastApi
